ABCD abcd
1234@#&*

Michroma is a modern geometric sans-serif typeface with a distinctive futuristic character. Inspired by the retro-futurist aesthetics of the 1960s, it features wide proportions, rounded-square shapes, and clean, precise lines. Its bold and technological feel makes Michroma a strong choice for logos, headlines, interfaces, posters, sci-fi visuals, sports branding, and projects that need a confident, sleek, and slightly space-age visual tone.

Logo Concept

The PRO MIAMI REALTY logo combines the key ideas of the brand: real estate, new opportunities, and the distinctive atmosphere of Miami. The open door symbolizes access to a new home, smart investments, and future possibilities. The palm tree inside the mark highlights the connection to Miami, its warm climate, coastal lifestyle, and premium living experience.

The clean geometric style and extended modern typography create a feeling of reliability, professionalism, and confidence. The deep green color is associated with stability, growth, trust, and investment value. Overall, the logo communicates the idea of a company that opens the door to quality real estate and comfortable living in Miami.

Logo Clear Space

To ensure the logo remains clear, recognizable, and visually balanced, a protective clear space must always be maintained around it. This area prevents other graphic elements, text, images, or layout borders from interfering with the logo.

The minimum clear space is defined by the height and width of the letter "P" from the logo typography. This spacing should be applied equally on all sides of the logo and must remain free from any additional visual elements. Maintaining this rule helps preserve brand consistency, readability, and a professional appearance across all applications.
